

CC21 & CC30

CARD CUTTERS

WWW.SECABO.COM

EXCHANGE- ABLE BLADE BLOCK

With different easy to change blade blocks, cuts in various dimensions can be produced.

SINGLE SHEET FEEDER

The comfortable single paper feeder allows for productive and accurate operation of the Secabo card cutters.

USER INTERFACE

The digital user interface allows for various settings to be made easily, among others to set the feeding length for cutting.

CUTS IN STACK CUTTER QUALITY

The all around cut products are highly accurate and identical.

SECABO CARD CUTTER CC21 & CC30

Secabo card cutters are the perfect helpers for producing small to medium quantities of business cards and other print products to be cut out of DIN A4 and DIN A3 formats. An easily replaceable knife block determines the width of the processed objects, the feed length can be electronically configured in the menu. Based on the inserted knife block and configured feed length, the CC21 reliably and automatically cuts DIN A4 n-ups in stack cutting quality, just as the CC30 does with DIN A3 n-ups. In the case of business cards, for example, the unit always cuts off paper strips between the cards, as well as along all outer edges, thus facilitating the use of bleed margins to achieve absolutely

professional results. Both models can cut paper with a thickness of up to 400g/m². Matching knife blocks for 85 mm and 90 mm business cards are already included with the CC21 and the CC30, while additional blocks, e.g. for DIN A6 cards, can be optionally purchased. Using Secabo card cutters is easy, does not require expert knowledge and will always yield perfect results for copy shops and print service providers!

CC21

CC30
